

GUIDING DIGITAL TRANSFORMATION TO UNLOCK VALUE FROM YOUR OPERATIONAL DATA

Your data holds the key to higher uptime and better equipment efficiency. We help you extract insights and drive actions that transform operational potential into competitive gains.

Real-time visibility into operational performance is essential to achieving success in today's competitive environment. Successful Digital Transformation (DX) is the driving force behind world-class manufacturing operations.

PRACTICAL, POWERFUL EXECUTION

Knowing asset utilization or capacity, identifying major sources of downtime, optimizing your supply chain integrations, locating and removing constraints and improving product quality are all fundamental challenges that lead manufacturing organizations in search of manufacturing intelligence solutions.

DIGITAL TRANSFORMATION REQUIRES A CLEAR ROADMAP

DX Accelerator™
Guides The Way

KNOW EXACTLY WHERE TO START
AND HOW YOU'RE GOING
TO GET THERE

DX Accelerator is designed to help you achieve clarity on your Digital Transformation initiative.

EOSYS partners with you to develop an optimal implementation roadmap, prioritizing time to value, long-term scalability, and total financial return.

Using our proven approach, we guide you through the critical thinking required to create a simple strategic roadmap and clear phase 1 scope that you can count on - specific to your operations and goals.

01: DISCOVERY

Identification

Stakeholders, Drivers, Current State & Goals

Vision

Develop Long & Short Term Vision

Mapping

Understand Budgets & Develop Next Steps

02: ONSITE WORKSHOP

Process Flows

Develop Process Flows & KPIs

Infrastructure

Identify Infrastructure Gaps

Tools & Reqs

*Identify Solution & Tool Preferences;
Create Operational & User Requirements*

03: ROADMAP

Solutions

*Map Phased Approach;
Platform & Solution Recommendations*

Deliverables

Verification of Goals & Deliverables

Proposals

*Phase 1 Detailed Proposal;
Future Phase Budgetary Proposals*
